

Frequently Asked Questions

Why will it take 10 years to complete the project?

Our plan calls for significant infrastructure modifications, literally rebuilding our product campus from the underground up – all while maintaining operations.

What are the construction hours for the project?

In accordance with city of Dearborn regulations, exterior construction will take place between 7 a.m. and 7 p.m., Monday through Saturday.

How much noise will the construction cause?

All construction will be in accordance with city regulations for noise control.

Will dust be an issue during construction?

As with most construction projects, there will be dust; however, we are using industry-best practices for dust mitigation.

Will the new parking deck lights shine into my neighborhood?

Parking deck 400 will now be located behind Edison Park. We will limit light levels, dimming lights during evening hours with the exception of required emergency lighting.

What is the height of the parking deck behind Edison Park and the Research and Engineering campus?

The parking deck will be an open-air five-story structure, approximately 65 feet high with glass stair towers.

How will traffic be affected?

A traffic consultant has completed a study. The main arterial roads have adequate capacity to support the increased population of the Ford campuses. Interior roads will be reconfigured to address internal congestion. In addition, we expect many employees to travel less from office buildings during the day because of new technology and collaborative work environments.

Will Military Road be reopened?

Decisions on road openings and closures are determined by the city of Dearborn and Wayne County Road Commission.

Will Edison Park be affected by Ford's Dearborn campus transformation?

Edison Park will not be affected by construction activities.
