

Ford Motor Company

Smelter and Refiner List (2024 RY)

Gold, Tantalum, Tin, Tungsten

Ford is committed to respecting human rights, including the right to clean air and clean water, across our entire business and value chain. This commitment guides our decision-making and our actions, and extends to our suppliers and business partners, from the origin of the raw materials used to make our products to the end-of-life of these products. Guided by our [We Are Committed to Protecting Human Rights and the Environment](#) policy, our goal is to ensure that everything we do, or that others do for us, meets or exceeds the minimum regulatory requirements and strives to create a positive impact on people and the planet.

Ford uses our purchasing power to enable responsible sourcing. Our suppliers are required to use smelters and refiners that have been validated as conforming to an independent third-party responsible mineral sourcing validation program. As members of the Responsible Business Alliance (RBA) and Responsible Minerals Initiative (RMI), we use data from our suppliers from reporting templates to engage processors to undergo RMI's Responsible Material Assurance Process (RMAP) and ESG assessment. We also contribute annually to the RMI Assessment Fund for RMAP Participating Smelters and Refiners to incentivize non-participating smelters or refiners to participate fully by paying for the costs of their initial assessment and supporting needs-based reassessments.

Below is a list of all smelters and refiners submitted by our suppliers for parts and components used to produce our vehicles in 2024. Smelter and refiner information provided by suppliers may be incomplete or over-inclusive. Therefore, we are unable to identify with certainty the specific facilities used to process the Tin, Tantalum, Tungsten and Gold (3TG) in our products and whether the 3TG in our products is from recycled/scrap sources.

More information on our Responsible Materials Sourcing program is available in Ford's annual [Integrated Sustainability and Financial Report](#) and our annual [Conflict Minerals Report](#).

* Ford does not directly import gold from the Russian Federation. If any gold in products supplied to us was from any Russian Federation gold smelter or refinery, it would have been substantially transformed prior to receipt and incorporation into our finished products.

** Entity became an OFAC Specially Designated National (SDN) on March 17, 2022. Ford does not have reason to believe African Gold Refinery Limited ("AGR", CID03185) was present in Ford's supply chain after the SDN designation.
